

COMO SUBIR TU PÁGINA WEB A UN SERVER

con 000webHost

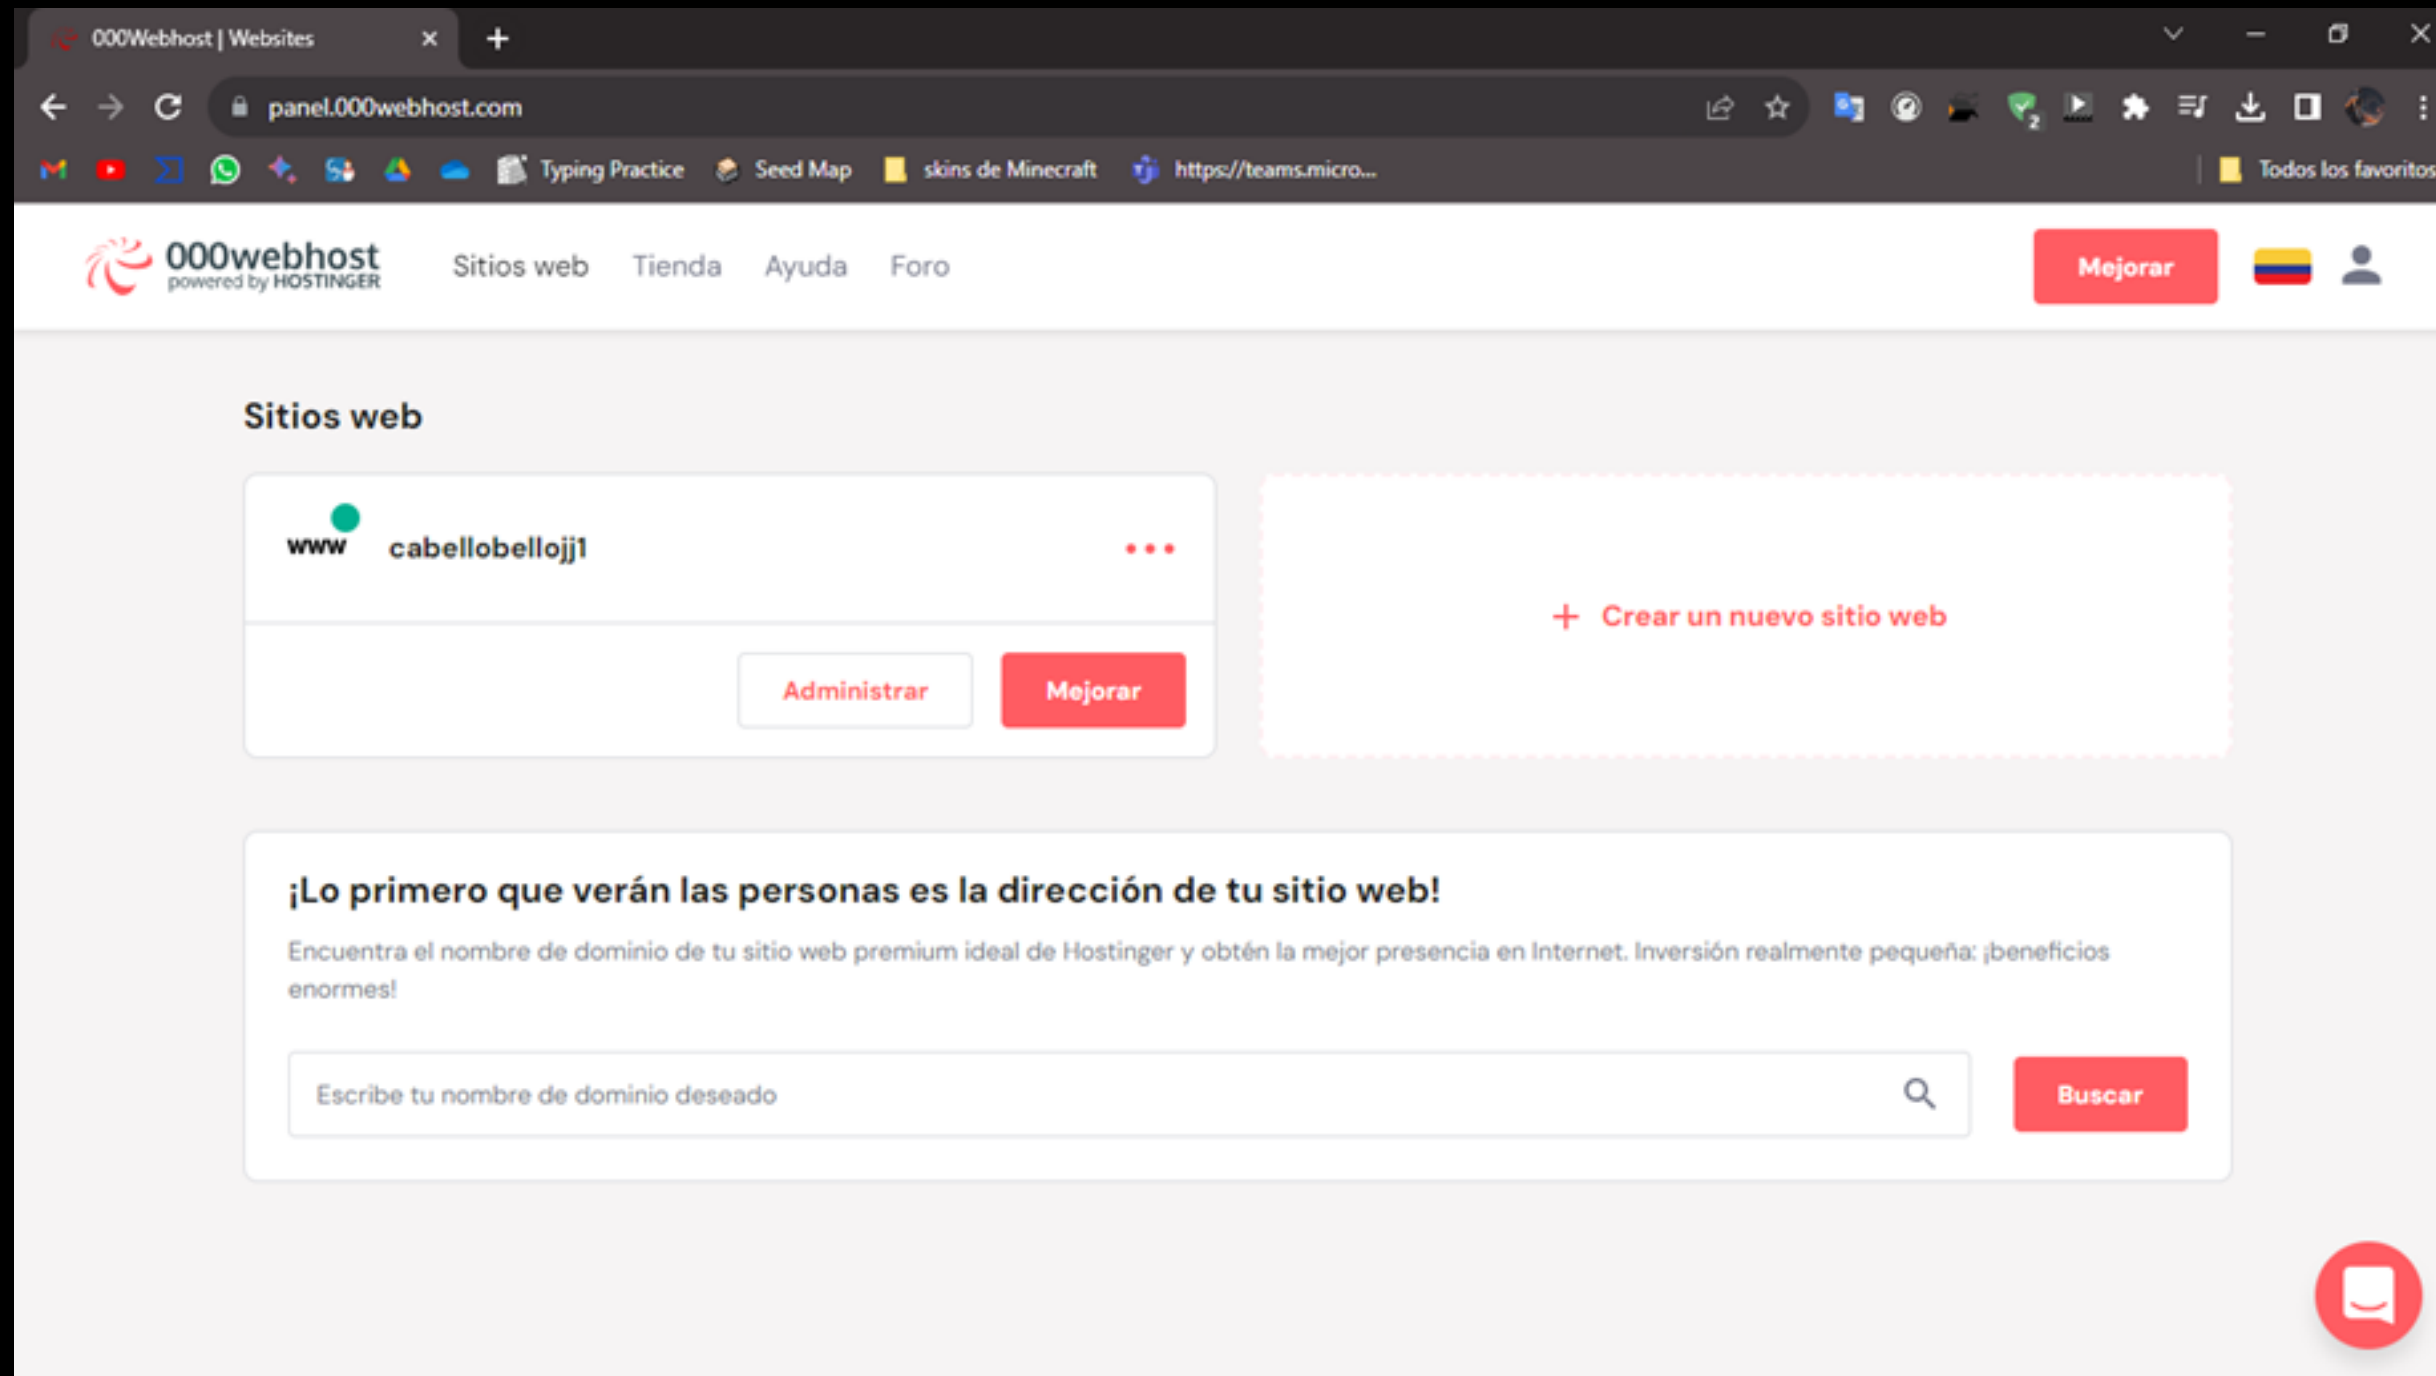

Link : https://www.canva.com/design/DAFy9Z06EZY/OzykPUXCdLt1r4erXEksGA/edit?utm_content=DAFy9Z06EZY&utm_campaign=designshare&utm_medium=link2&utm_source=sharebutton

Se abre el 000webHost, se registra y loguea.

Se crea un nuevo sitio:

Se crea con nombre y contraseña:

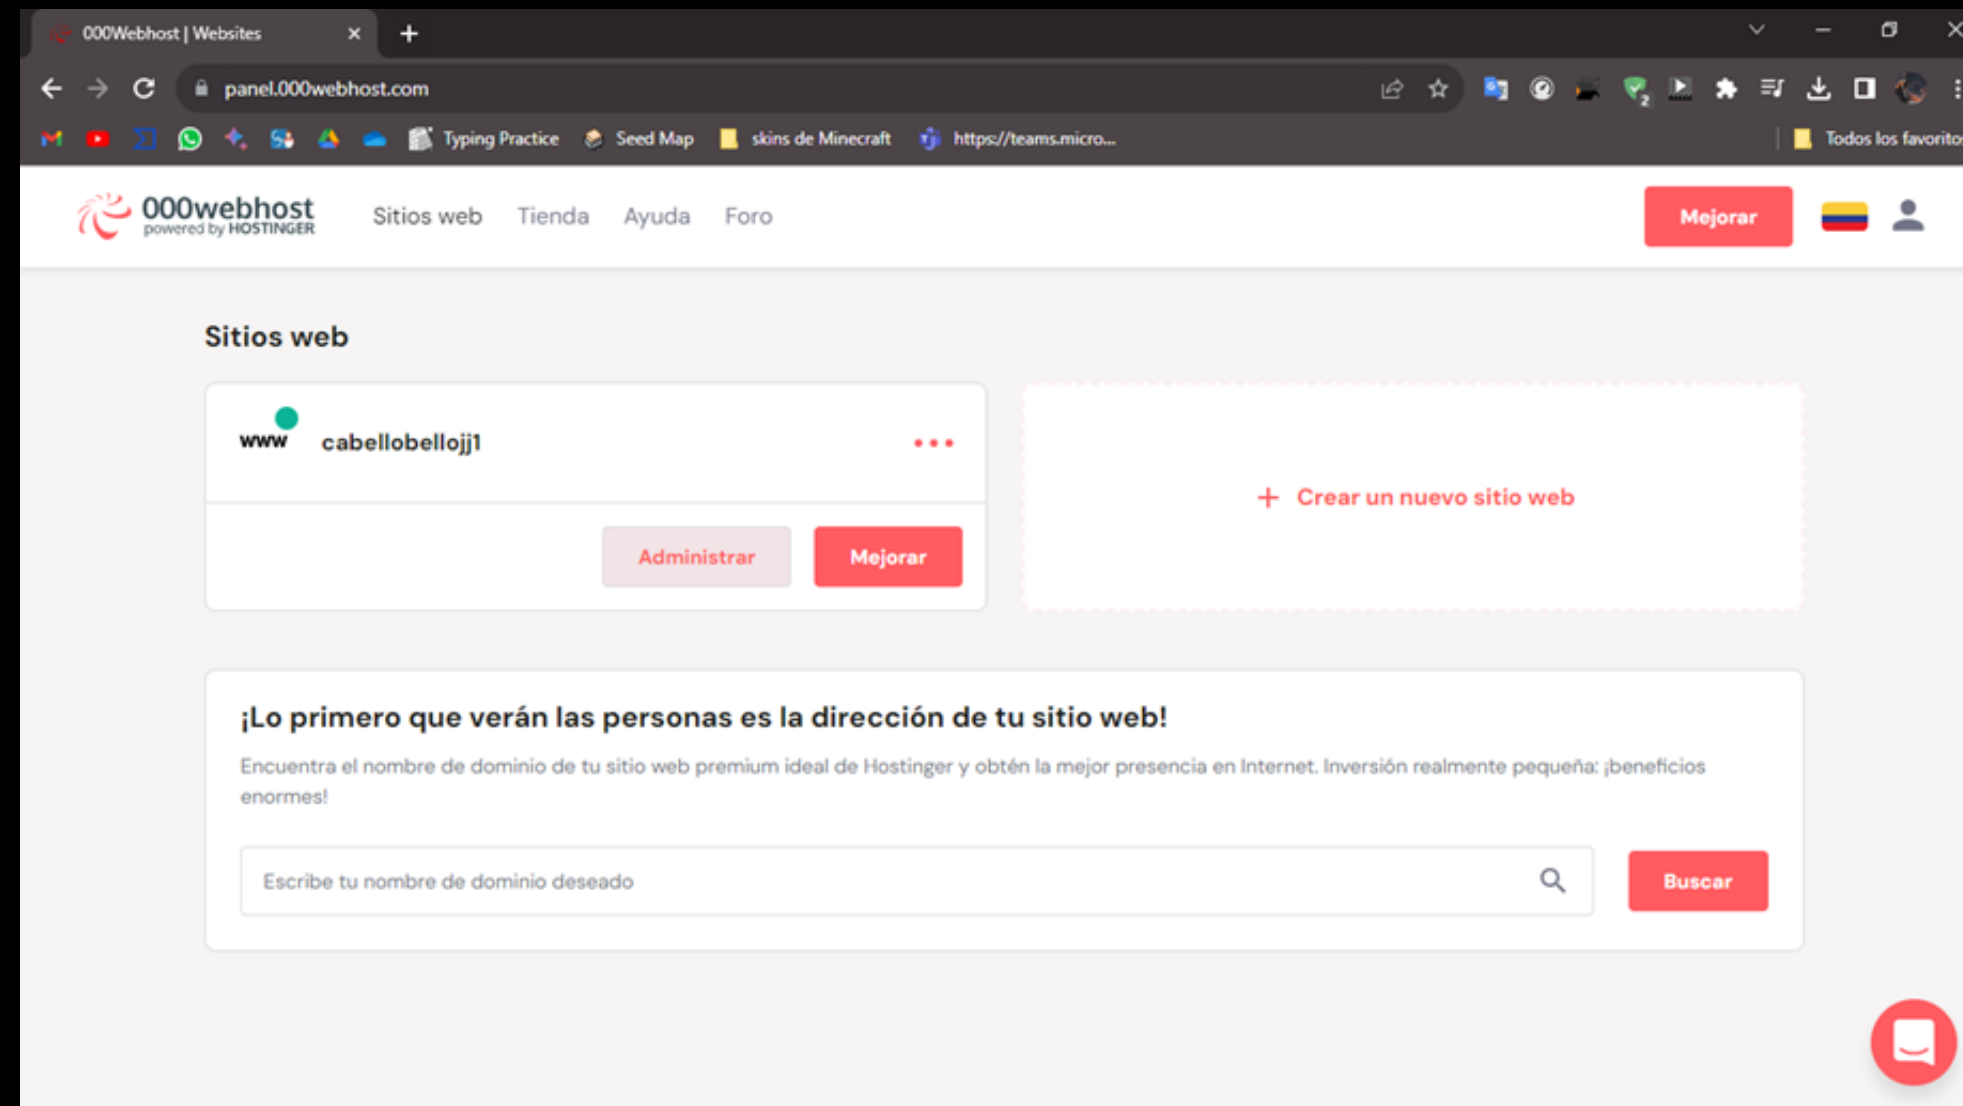

The screenshot shows the 000webhost website creation interface. A modal titled "Crear nuevo sitio web" is displayed in the center. The modal contains the following elements:

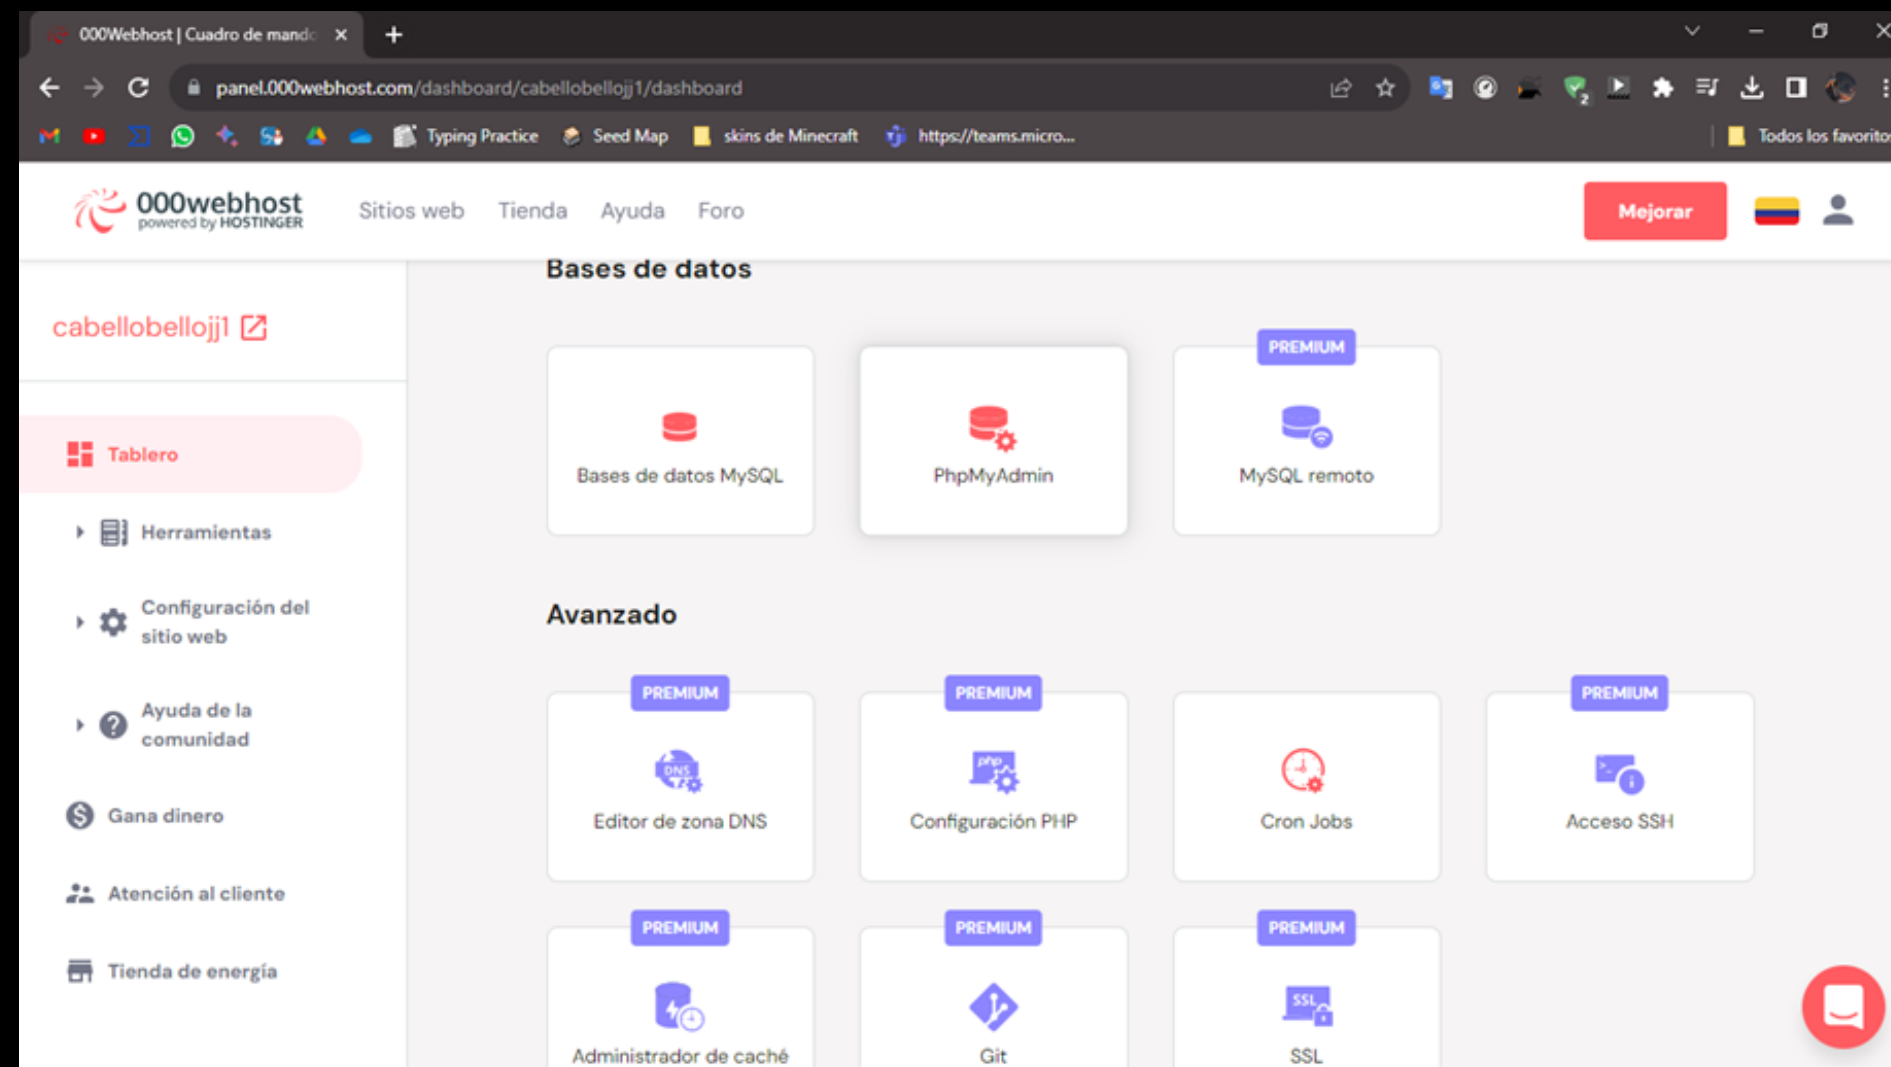

- Crear nuevo sitio web**: The title of the modal.
- Crea el sitio web ideal fácilmente en 000webhost.com**: A subtitle.
- Elige el tipo de sitio web:**: A section header for selecting the website type.
- Radio buttons**: Two radio buttons are present: "Sitio web WordPress" (selected) and "Sitio web sencillo".
- Nombre (optional)**: A text input field with a red border and a red outline, containing a single character.
- Contraseña**: A password input field with a red border and a red outline, containing a single character. A red eye icon is visible to the right of the field.
- Password does not meet the requirements**: A red error message displayed below the password field.
- Cerrar**: A red button located at the bottom left of the modal.
- Crear**: A dark blue button located at the bottom right of the modal.

The background of the screenshot shows the 000webhost website creation interface, including the header with the 000webhost logo and navigation links (Sitios web, Tienda, Ayuda, Foro), and the main content area with a "Sitios web" section and a "¡Lo primero que verán las personas!" section.

Oprime el botón de administrar donde se cambiarán algunas cosas

se abre el apartado de DB por medio de phpmyadmin:

Se Crea una nueva DB:

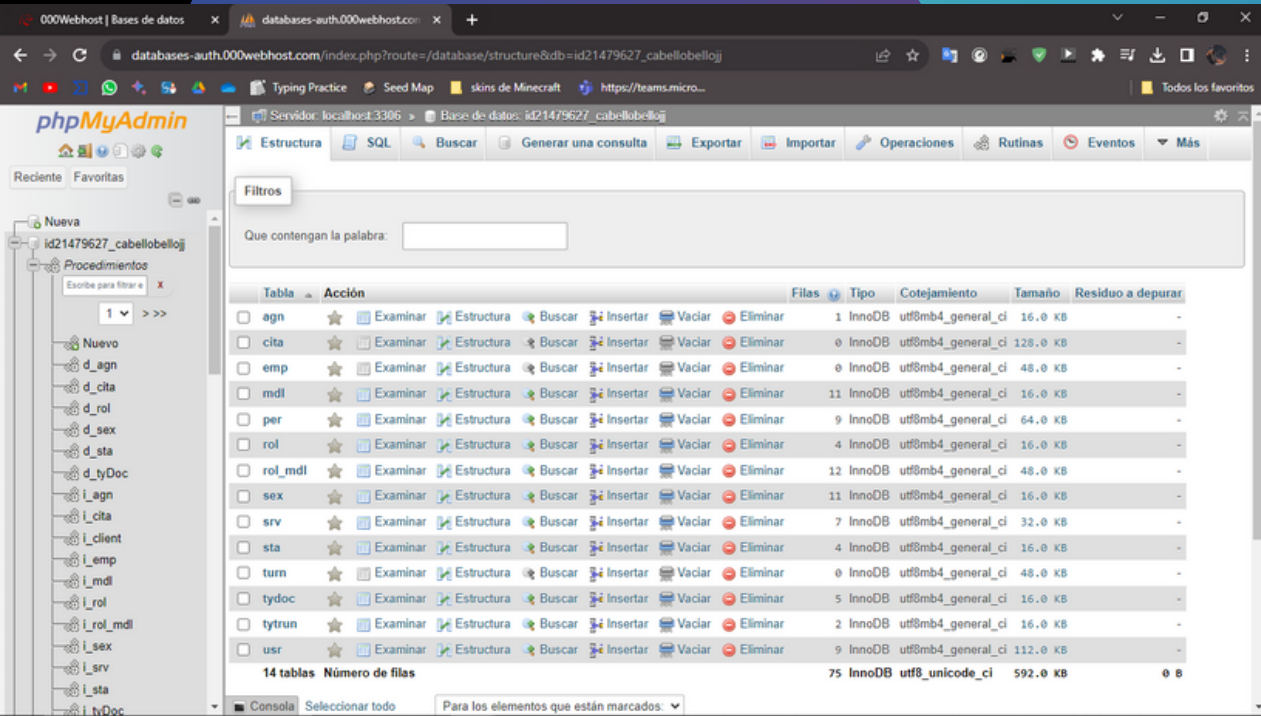

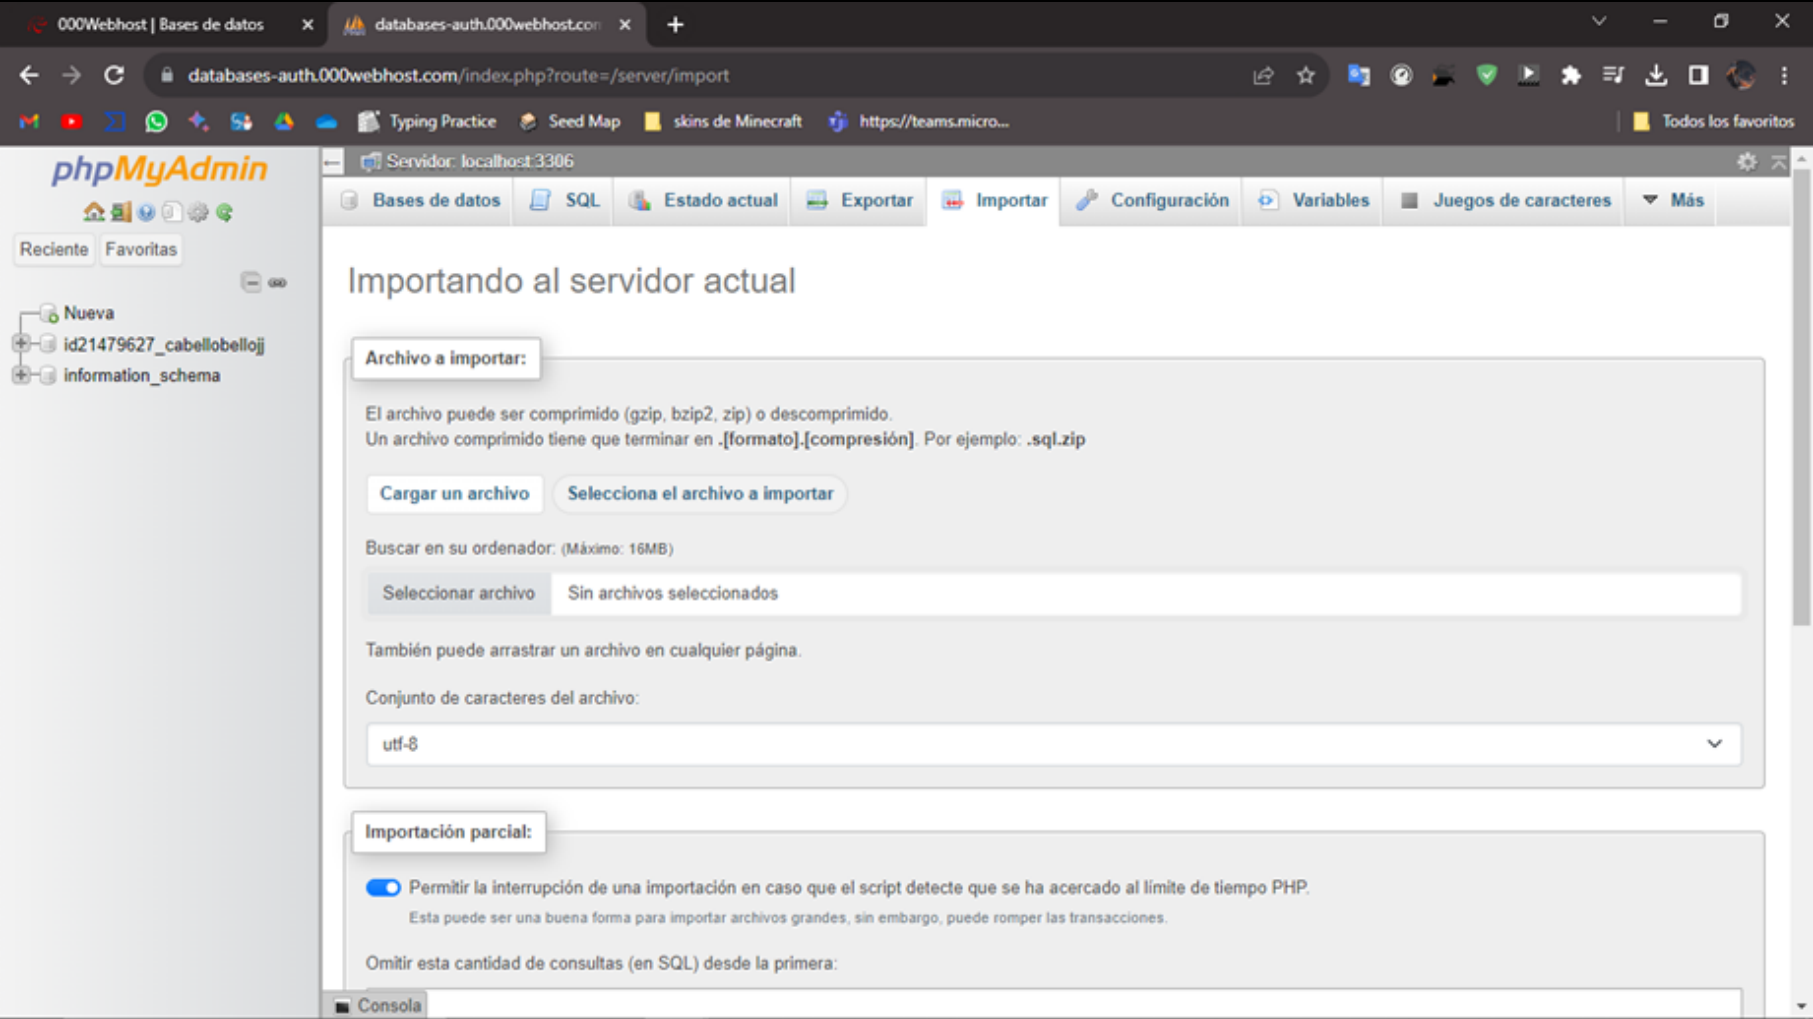

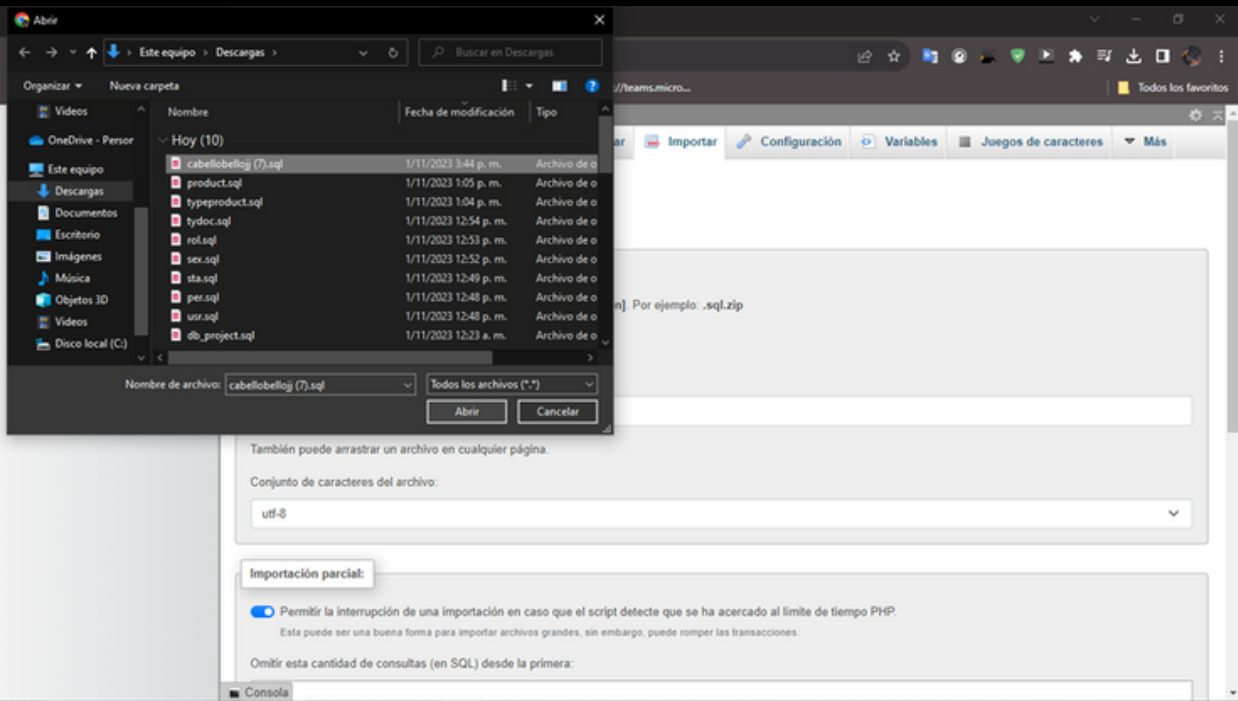

The screenshot shows the 000webhost dashboard for a user named 'cabellobellojj1'. The main section is titled 'Bases de datos' (Databases). A prominent red button labeled 'Crear nueva base de datos' (Create new database) is displayed, with a subtext explaining its purpose: 'Crea una base de datos donde puedas almacenar mucha información, como cuentas de usuario, publicaciones, comentarios y otros datos que el sitio web necesita para funcionar correctamente.' (Create a database where you can store a lot of information, such as user accounts, posts, comments and other data that the website needs to function correctly.)

Below this, the 'Administrar bases de datos' (Manage databases) section contains a table listing the existing databases. The table has columns for 'Nombre' (Name), 'Usuario' (User), 'Host', 'Mesas' (Tables), 'Tamaño' (Size), and a status indicator '1 / 2'.

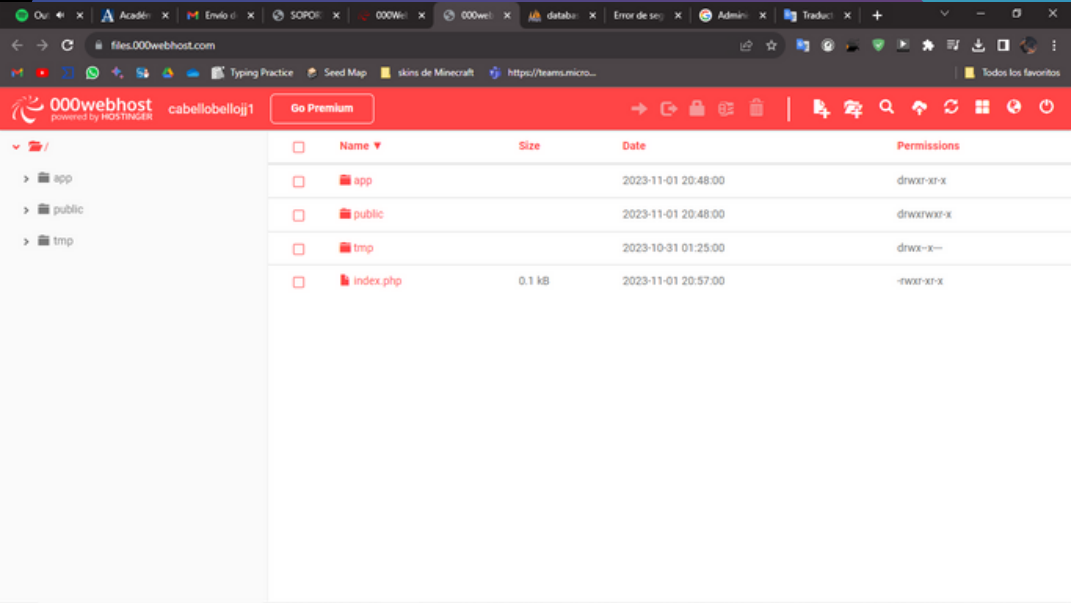

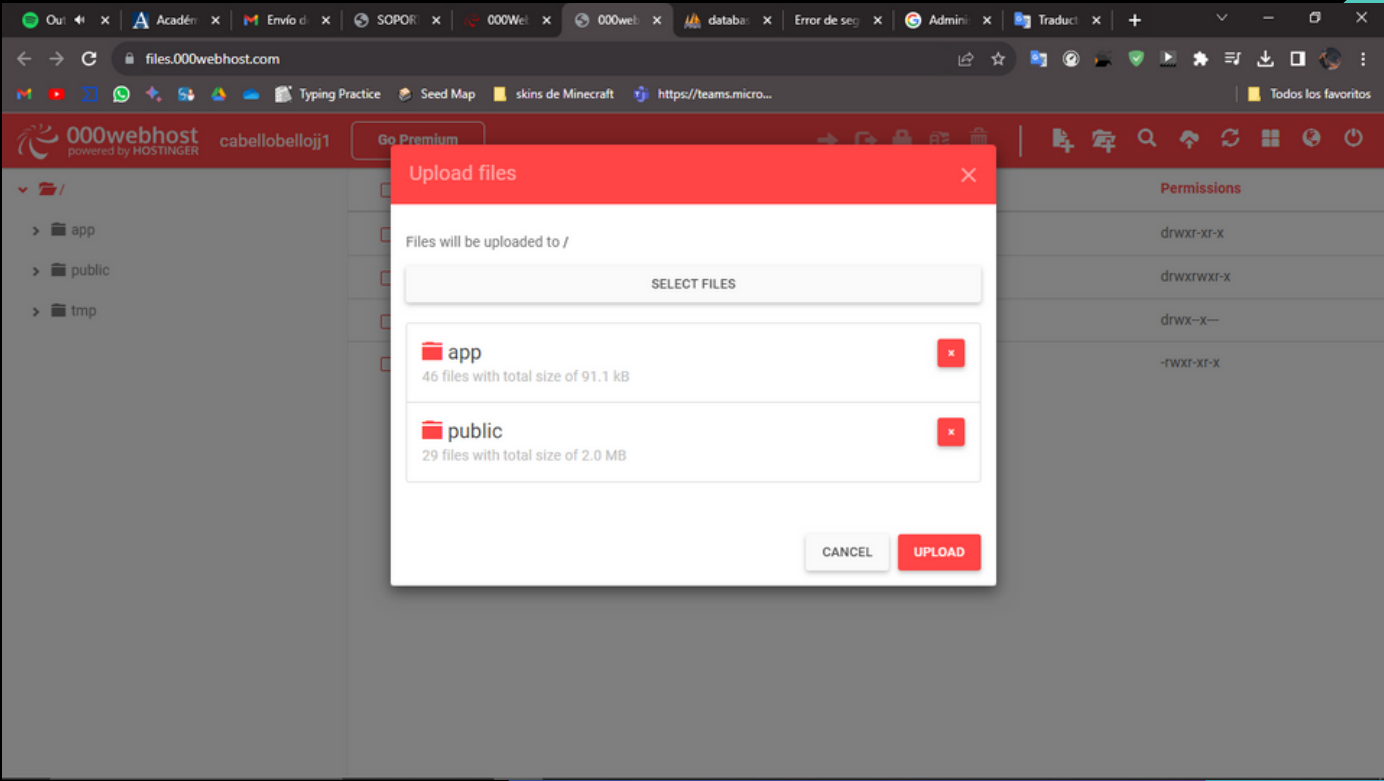

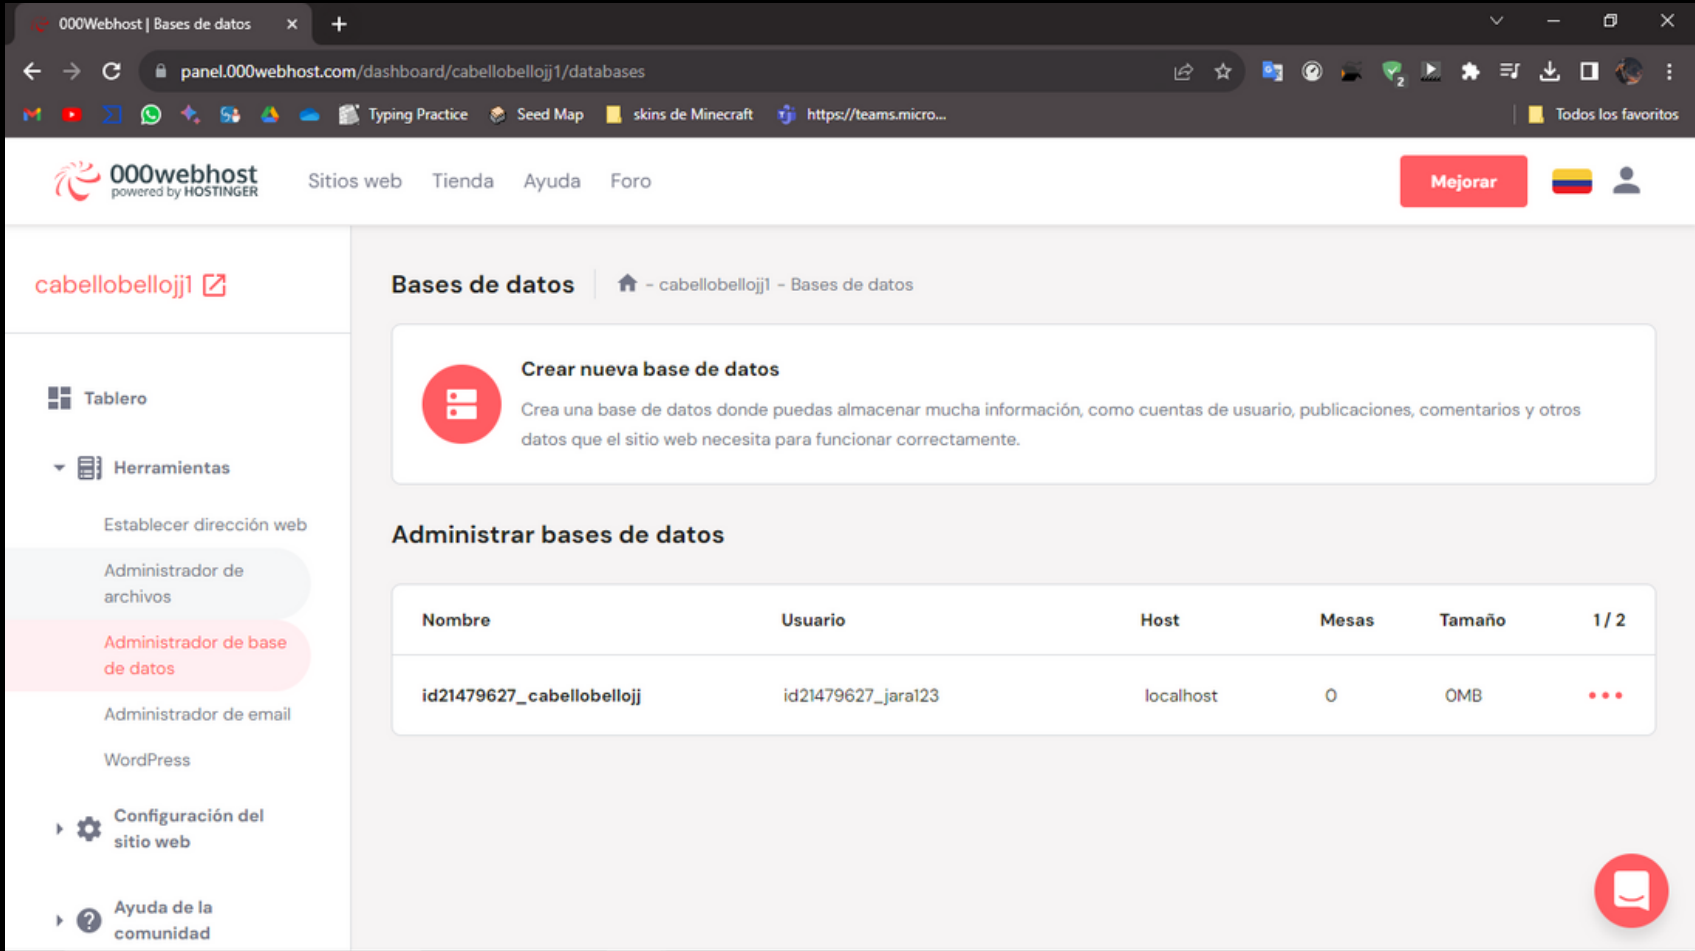

Nombre	Usuario	Host	Mesas	Tamaño	1 / 2
id21479627_cabellobellojj	id21479627_jara123	localhost	0	0MB	...

The left sidebar contains navigation links for 'Tablero', 'Herramientas' (Tools), and 'Configuración del sitio web' (Website configuration). The 'Herramientas' section is expanded, showing options like 'Establecer dirección web', 'Administrador de archivos', 'Administrador de base de datos' (highlighted in red), 'Administrador de email', and 'WordPress'.

Se importa la base de datos mediante un archivo externo o por comandos sql pegados en la consola

Se abre el apartado de administrar archivos y se cargan

Se cambian las constantes de las rutas y la Db del proyecto

The image shows a Visual Studio Code editor window with a project explorer on the left. The project explorer shows a folder structure with files like Constants.php, Controller.php, Database.php, Model.php, Routing.php, and various folders like Database, Models, Views, and public. The main editor area displays the content of Constants.php, which is a PHP file defining constants for the application configuration.

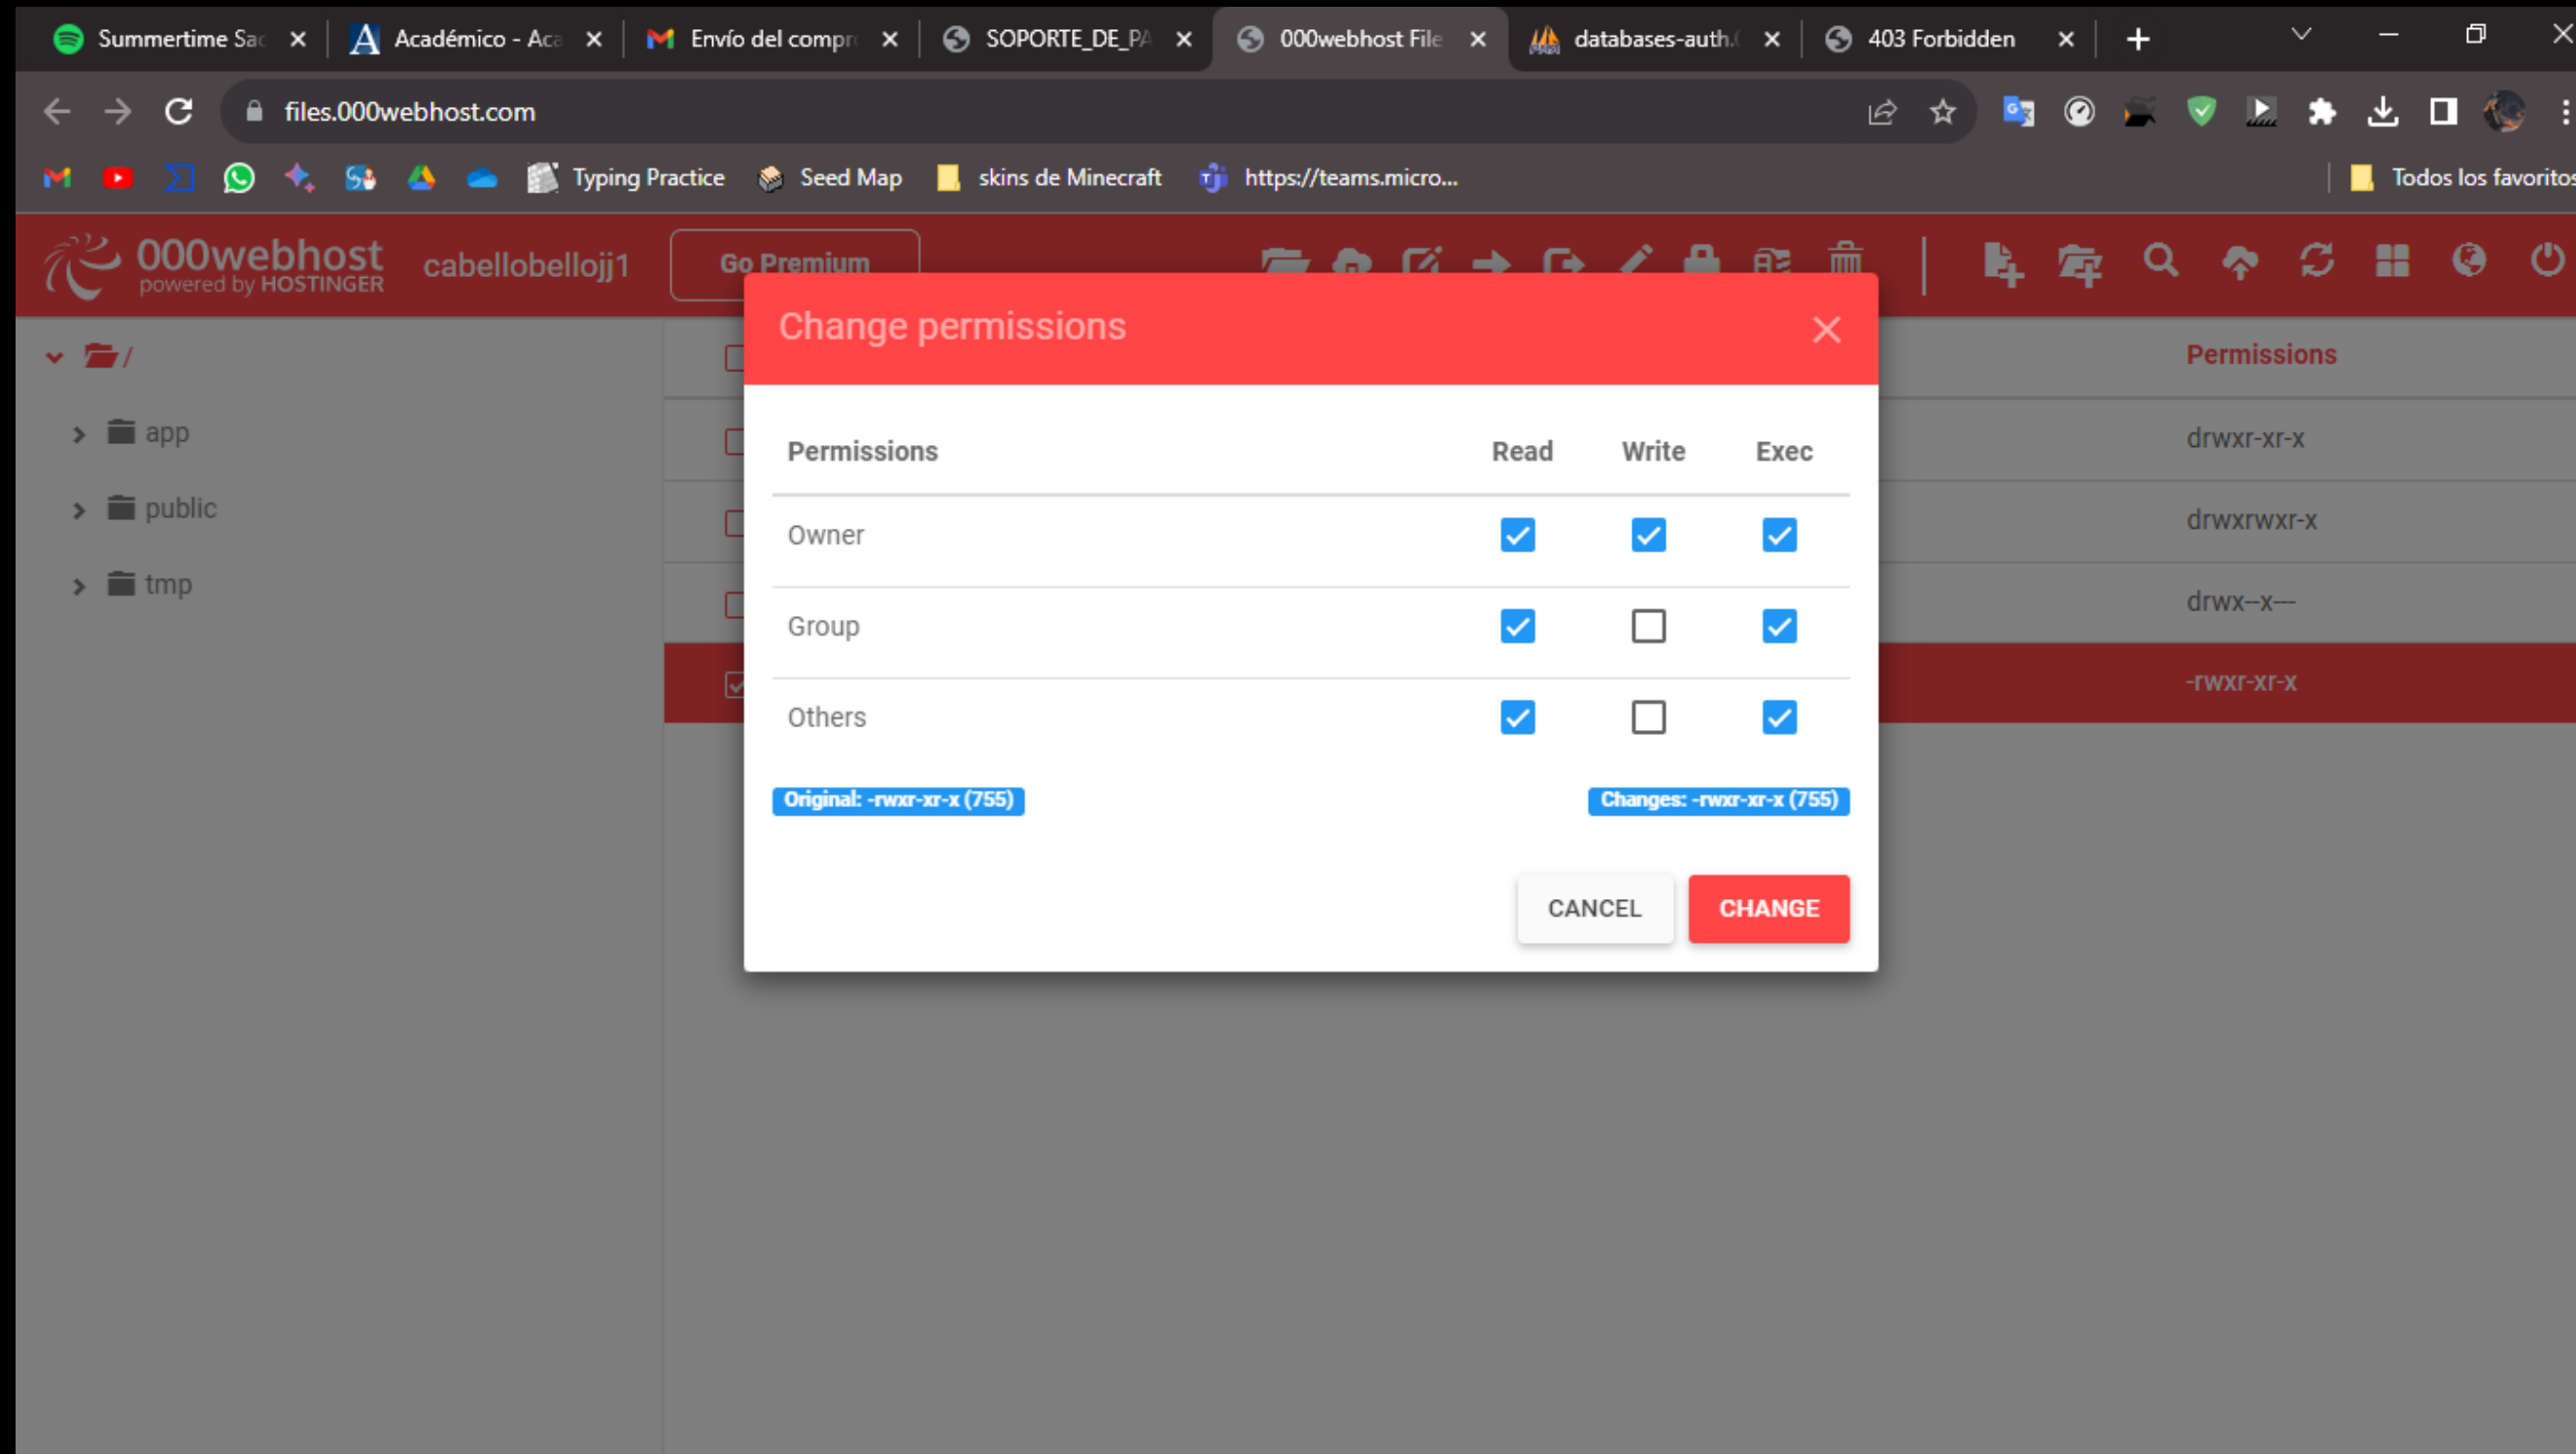

```
1 <?php
2 namespace App\Config;
3
4 /* Default Data Database*/
5 define('HOST','localhost');
6 define('DB','cabelloBelloJJ');
7 define('USER','root');
8 define('PASS','');
9
10 /* Default options */
11 define("DEFAULT_FOLDER","public/");
12 define("DEFAULT_CONTROLLER","Guest");
13 define("DEFAULT_CONTROLLER_LOGIN","home");
14 define("DEFAULT_METHOD","show");
15 define("DEFAULT_ACTION","list");
16 define("DEFAULT_ROL_ID",4);
17 define('DEFAULT_USR_NM','Guest');
18
19 + /* Default App options */
20
21 define("APP_URL","http://127.0.0.1/SENA/Project/app/");
22 define("APP_URL_PUBLIC","http://127.0.0.1/SENA/Project/public/");
23 define("APP_NAME","Cabello Bello JJ");
24 define("RUTE_HOME","template/" . DEFAULT_CONTROLLER_LOGIN . "/" . DEFAULT_CONTROLLER_LOGIN);
25
26 define("DEFAULT_ROUTE", APP_URL_PUBLIC.DEFAULT_CONTROLLER . "/" . DEFAULT_METHOD);
27
28
29 /* Default time zone options */
30 date_default_timezone_set("America/Bogota");
```

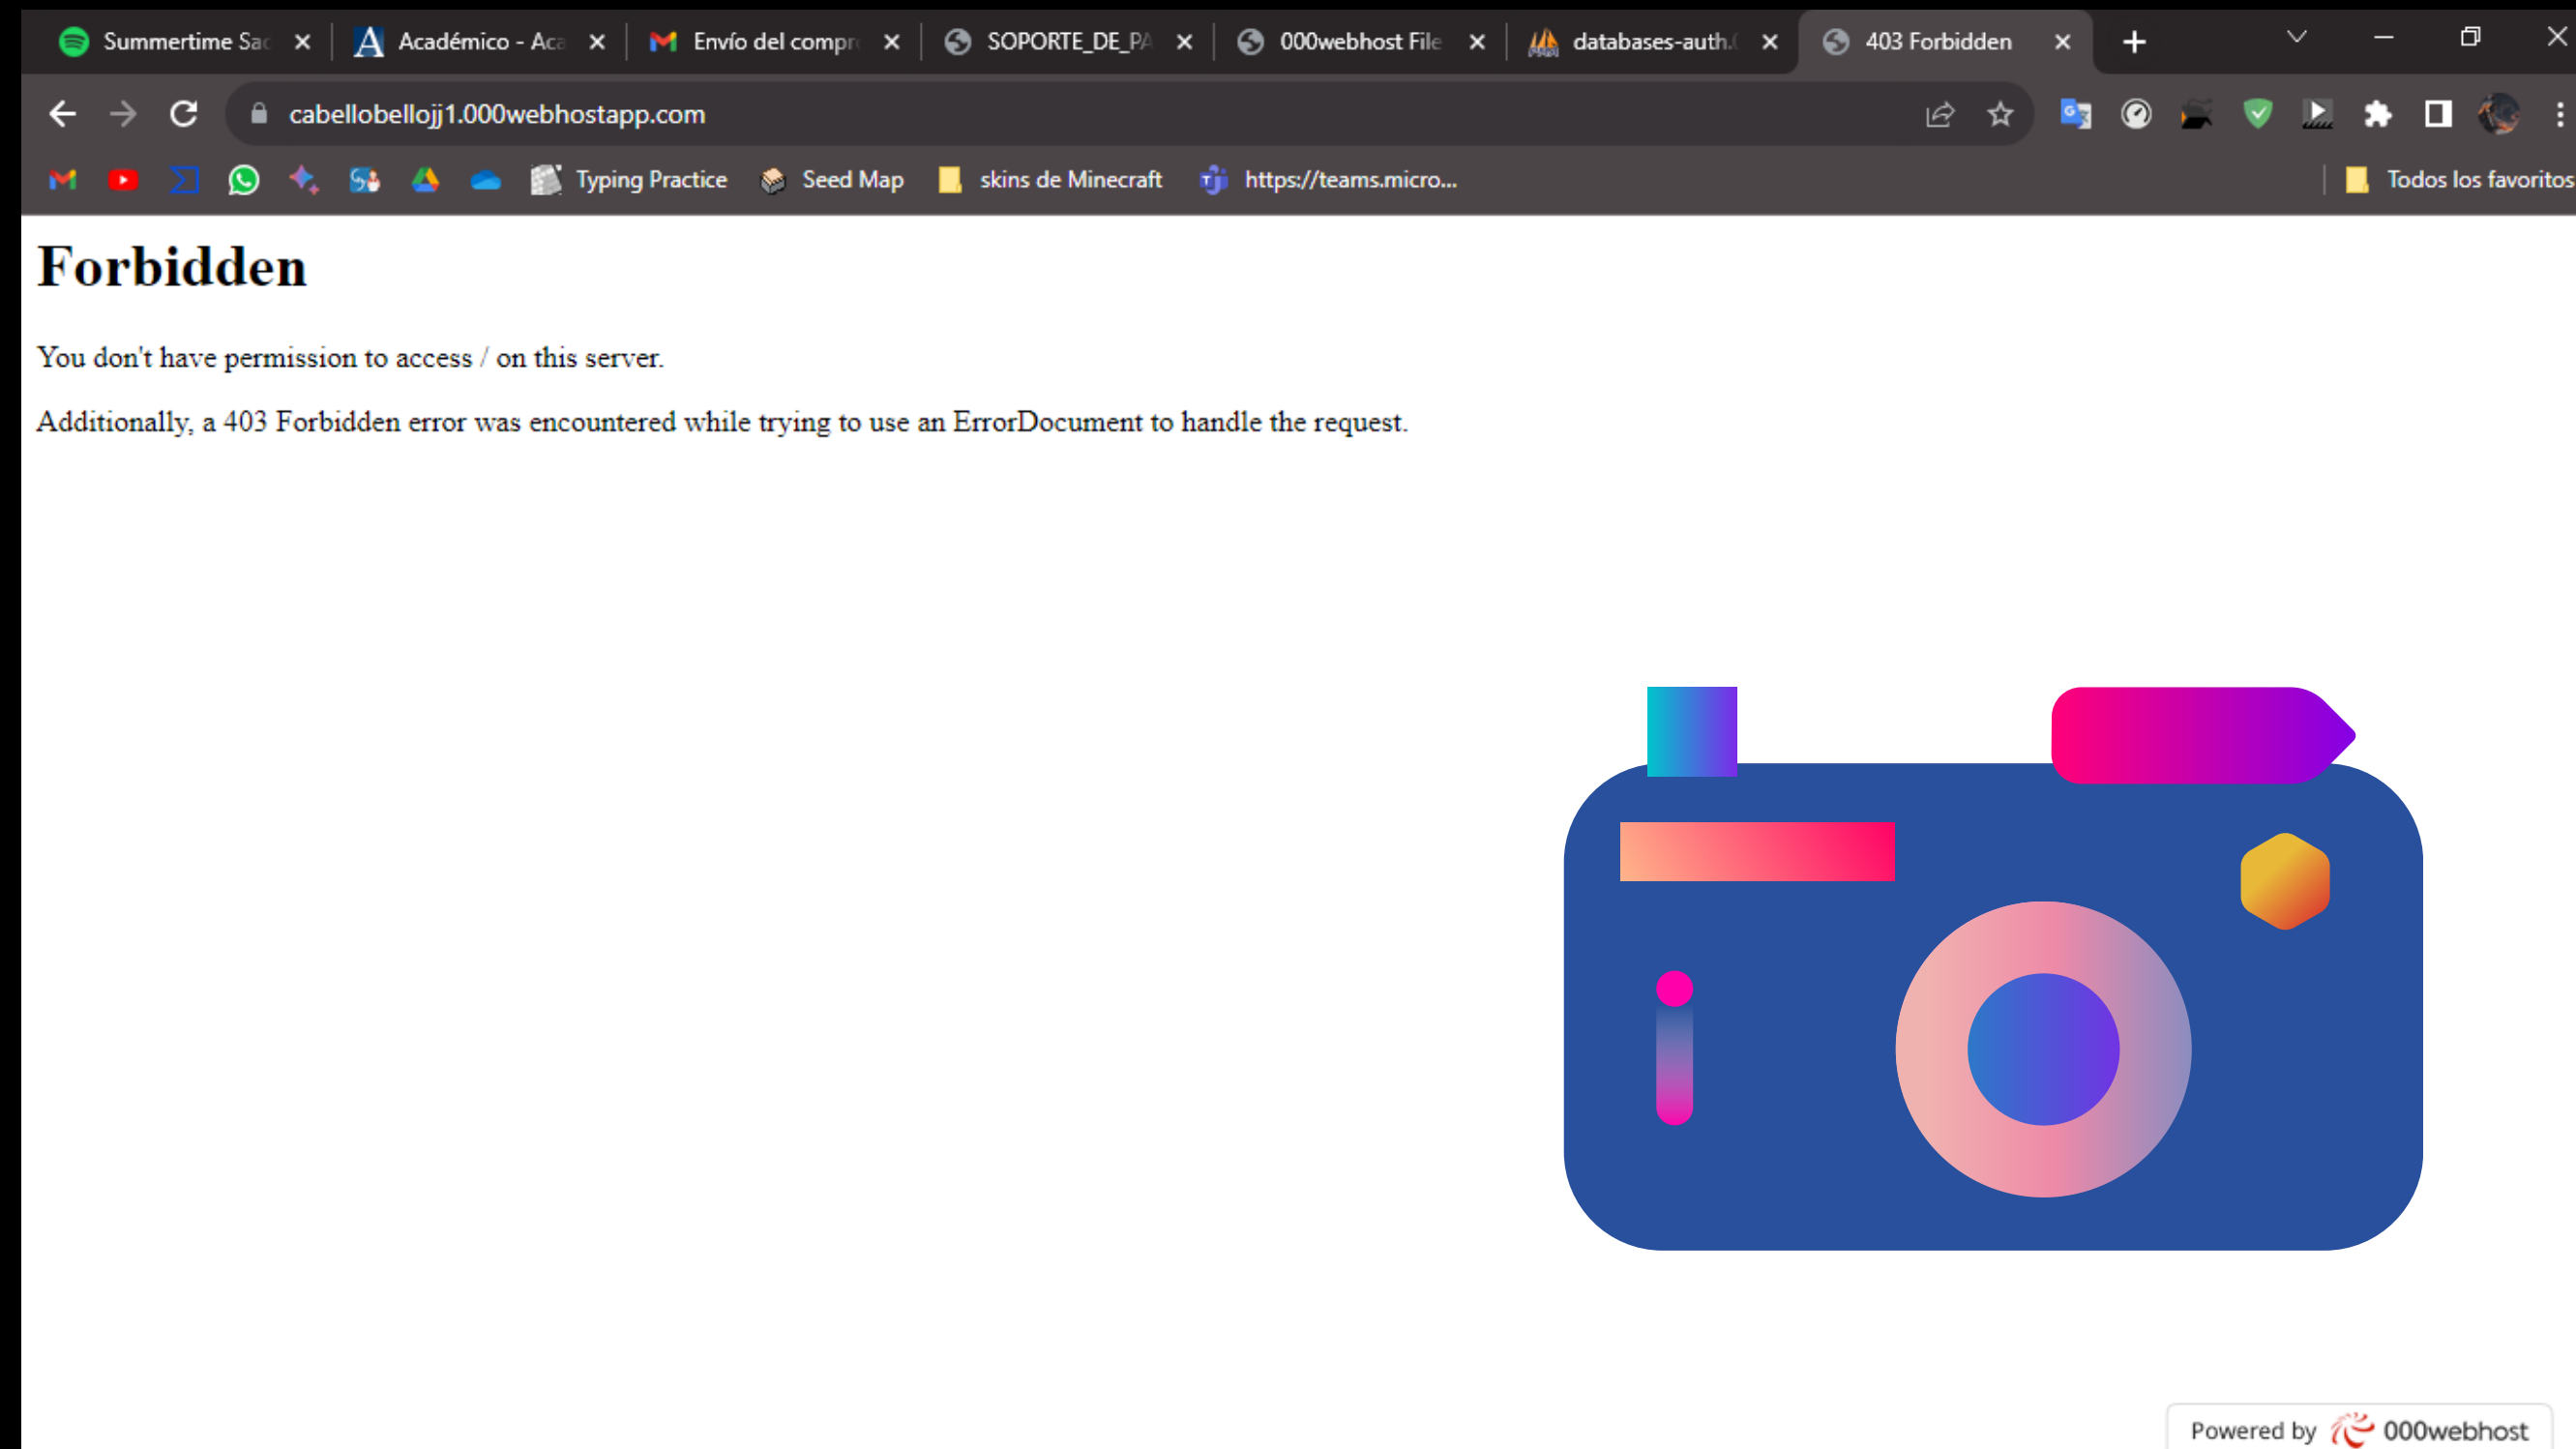

The image shows a web browser window displaying the 000webhost File Manager. The browser address bar shows the URL files.000webhost.com. The file manager interface shows a directory tree on the left with folders like app, Config, Controllers, Database, Models, Views, public, and tmp. The main area shows the content of the file /app/Config/Constants.php, which is a PHP file defining constants for the application configuration.

```
1 <?php
2 namespace App\Config;
3
4 /* Default Data Database*/
5 define('HOST','localhost');
6 define('DB','cabelloBelloJJ');
7 define('USER','root');
8 define('PASS','');
9
10 /* Default options */
11 define("DEFAULT_FOLDER","public/");
12 define("DEFAULT_CONTROLLER","Guest");
13 define("DEFAULT_CONTROLLER_LOGIN","home");
14 define("DEFAULT_METHOD","show");
15 define("DEFAULT_ACTION","list");
16 define("DEFAULT_ROL_ID",4);
17 define('DEFAULT_USR_NM','Guest');
18
19 /* Default App options */
20
21 define("APP_URL","cabelloBelloJJ1.000webhostapp.com/app/");
22 define("APP_URL_PUBLIC","cabelloBelloJJ1.000webhostapp.com/public/");
23 define("APP_NAME","Cabello Bello JJ");
24 define("RUTE_HOME","template/" . DEFAULT_CONTROLLER_LOGIN . "/" . DEFAULT_CONTROLLER_LOGIN);
25
```

Se modifican los permisos de las vistas

Y se ejecuta la página por medio del dominio

Gracias
